For shipping labels please call and we will email it to you, as well as boxes. For out of state we ship Fed Ex and in state All Counties Courier with two day shipping rates of \$14 and \$7 one way respectively. Fed Ex is now charging for picking up the case. We recommend dropping it off at the nearest Fed Ex location. Please bubble wrap up the models and parts to ensure there is no damage during shipment. For those cases requiring the implant manufactures or aftermarket titanium abutment please call us and we will discuss your options. Once we receive the case we will inspect it to determine if there are any missing parts (i.e. implant analog, etc.)

We prefer to use titanium bases to make the zirconia abutments due to their high tolerances, durability, and reduction of stress around the screw access area. We can make all zirconia abutments if you choose. Please call for details. The titanium bases we use have a 1mm margin collar (A) that is above the implant so the implant should be a minimum of 2 mm subgingival. We like to design the abutments so there is 3mm on the Buccal (C) and 5mm on the lingual (D) of titanium screw shaft to increase the strength and to maximize retention when cementing the zirconia to the titanium. We build up the zirconia to create a nice emergence profile and for greater esthetics. Custom shading is available at no additional charge. The abutments come with a final screw. We provide full restoration services including IPS E-max crowns and zirconia crowns (\$149-\$169).
